

Web Filtering for iPads®

Web Filtering for iPads®

Delivering Internet protection in today's mobile environment can be a real challenge. Increasingly networks are being extended beyond the traditional boundaries.

Netintelligence Web Filter, from iomartcloud, delivers flexible policy based management capabilities that can be centrally administered to meet the needs of specific groups. As Netintelligence Web Filter is not tied to a specific network or gateway it provides protection and control to all internet accessible devices, regardless of their physical location.

The Netintelligence Web Filter ensures all users of iPads enjoy a safe and secure browsing experience.

Netintelligence Web Filter works like a fully featured browser, with all the capabilities and 'pinch and tap' functionality that can be expected, combined with its award winning content filter. The content filter not only provides protection from known threats but automatically assesses new sites in real time.

A key feature of the Netintelligence Web Filter is centralized management and control. Once installed, Netintelligence can manage any device, individually or as part of a group, enabling full control and protection for an unlimited number of internet connected devices - be they tablets, smart phones, desktops or laptops - centrally. The Web based central Control Panel gives unparalleled management and reporting and can be accessed from anywhere.

Features

Fully featured Web Browser

The Netintelligence web browser is feature rich and provides all of the functionality expected from a tablet browser.

Instant policy updates

All policy changes made via the Central Control Panel are delivered in real time to the connected device.

Central management

With the Central Control Panel system administrators can manage settings, set policies, and view reports at any time. Fully flexible and customizable policy setting - by device, by user, by group
Each time the Control Panel is accessed, it also allow displays an instant snapshot of all devices protected by Netintelligence, enabling the identification of areas of immediate concern, allowing appropriate action to be taken – in real time.

Central reporting

Comprehensive and fully customizable real time reports detail all activities occurring on the devices and are available on demand through the Central Control Panel.

Simple installation

A simple download onto the device which automatically syncs with the Central Control Panel, allows users to be up and running in seconds.

Ultimate Protection

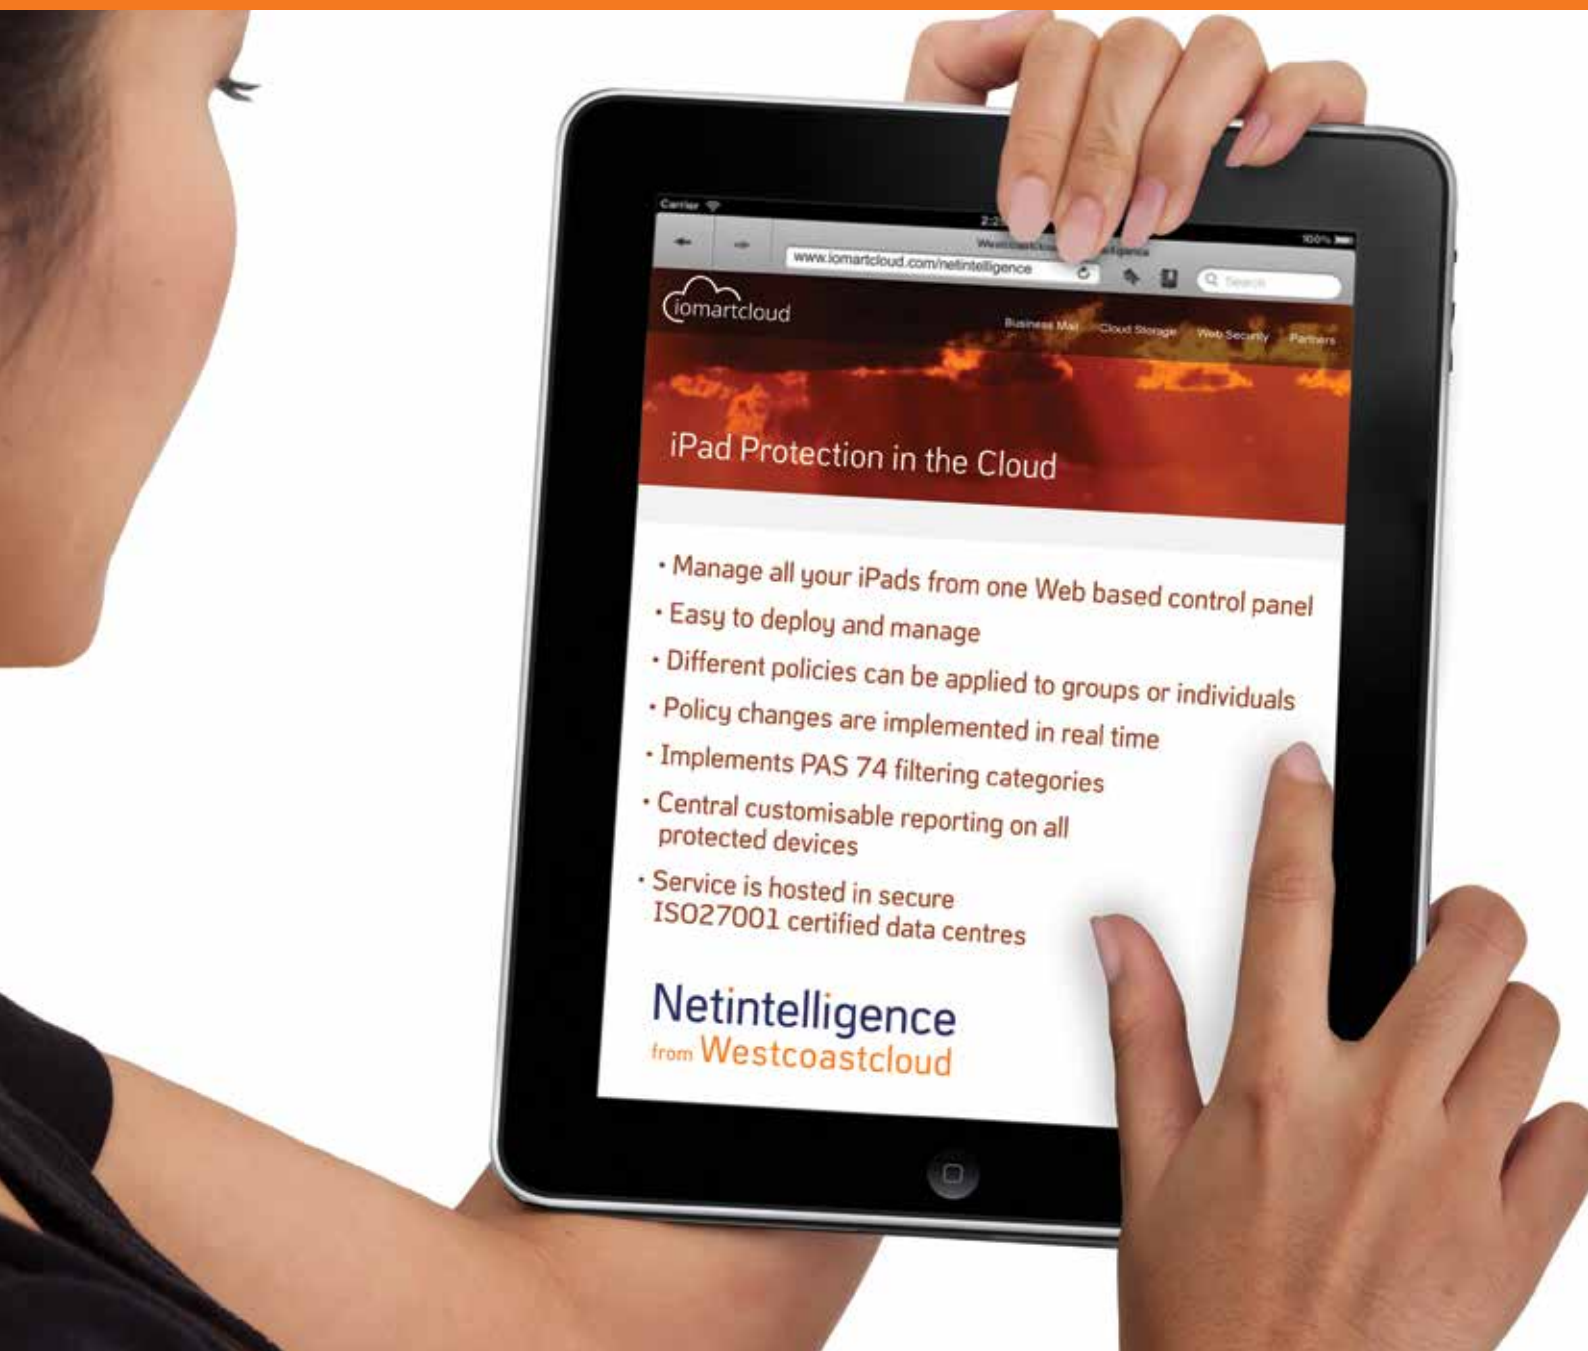

Supported by one of the largest databases of assessed threats in Europe with over 30 million files and counting. Each web site visited by the end user is assessed in real time.

Proven Capability

Netintelligence Web Filter from iomartcloud is the first content management system to have been awarded the British Standards Institution (BSi) Kitemark for Child Safety Online (PAS 74:2008 Internet Safety).
