Enterprise Manager

Netintelligence

'If organisations are serious about security and really want to get an accurate picture of what is happening on their network, I would recommend they look at Ni Enterprise Manager as their solution'
Mark Thorne, Manchester City Council

Workstation & Laptop control gets the hosted service treatment, with Ni Enterprise Manager offering a simple way of managing end user activity no matter where the users are. An 'all in one service' service that combines core security functionality of web filtering, IM & P2P control, firewall, asset and usage management with comprehensive reporting, Ni Enterprise Manager offers a truly unique 'plug and play' web based management, protection and control service.

Key Benefits

o COMPLETE view of ALL workstations/laptops regardless of their location

o PROTECTS your computers whether they are on or off your network

o NO Hardware or equipment required - PLUG & PLAY

o Multiple security applications in ONE product

o CONTROL & ENFORCE company policy centrally via a web based portal

o REDUCE legal Liability & RISK

o INSTANT CLEAR REPORTING on every user & machine on your network

o SAVE TIME and MONEY

o AUTOMATIC UPGRADES - new versions and updates delivered instantly

o NO MAINTENANCE CHARGES - simple per machine licensing

The Ni Enterprise Manager Service

Ni Enterprise Manager is a combination of both end point software client and hosted Service. The client resides on the target machines and provides the protection and a data collection service, whilst a web based hosted service provides the interface for setting and managing policies and reports. When connected to the internet, the client automatically receives new policies and updates without the need for any user intervention. The organisation receives real time user activity back from the clients - providing constant monitoring and a 'whole world' view regardless of the end point's location, connectivity or time.

Key Functionality

All of the listed features apply to Ni Enterprise Manager as STANDARD - no additional modules, no additional charges, no hidden costs, no equipment - Netintelligence is an 'ALL IN ONE' security and management control product.

o Central & Remote Control
Every feature of Ni Enterprise Manager is managed through an online Control Centre enabling remote and centralised control of every workstation/laptop regardless of their physical location or connectivity

o Web Blocking/Filtering
Fully flexible & customisable and Backed by Netintelligence's award winning databases of over 30m categorised threats

o Application Usage Monitoring
Record and monitor (rounded to the nearest minute) each users activity by time spent & application

o Instant Messenger Control
Prevent IM applications from operating or monitor and record all IM conversations - works with all major IM Clients

o Hardware Audit
Report on full build of every machine on the network

o Software Audit
Report on all installed software and gain an instant view on over/under licensed & unlawful software

o Software Change Management
Record and report on all changes to any software on any machine on the network - includes security patches and updates

o Peer to Peer (P2P) Control
Prevent or allow the operation of the most widely used P2P applications

o Policy Management
Create and enforce custom usage policies for individuals, machines, groups or total estate

o Reports
Real time customisable reporting on all usage & activity across every computer

o Deployment Tools
Web based integrated deployment tools enabling central deployment of clients to any machine on a directory

o User Privileges
Allow or prevent various Management rights to employees within your organisation e.g. View reports only, set or edit policy

o Email Filter Integration
Access your Netintelligence Email Filter Management console through a single Control Centre - provides easy control for both email and desktop management*

NB - Email Filter is a separate chargeable service

Ni Enterprise Manager - *An Overview*

"So should you consider Ni Enterprise Manager? The answer must be that you would be mad not to. In today's litigious climate protecting your corporate assets from abuse should be at the top of an administrators action list."
Server Management Magazine

TOTAL CONTROL AT YOUR FINGERTIPS -
Wherever you are......

The Netintelligence Online Control Centre puts you in control...
Change your settings, set your policies, and view all of your reports from any PC at any time using the Ni Enterprise Manager Central Control Panel. Simply by logging on, you will be able to 'click' and view all off your reports and change your settings - managing and enforcing your policies in real time. And as the information is constantly refreshed - you have as near to 'real time view' as is possible.

Ni Enterprise Manager provides you with the information that you need to ensure that your business is safe and secure 24 hours per day 7 days per week.

1. Complete Overview Dashboard
