

Ni Parental Control is the first all-in-one eSafety service for today's online community. The Internet has transformed the way that we communicate and it has opened up a whole world of exciting opportunities for our children. Yet in common with many of life's activities, the Internet

is not without its perils. 'Always On' can mean 'Always Vulnerable'.

Ni Parental Control is an essential service for anyone seeking total protection and peace of mind.

## UK's First BSi Certified Online Child Safety Service

### Ni Parental Control - The Service

Once Ni Parental Control is installed on your computer(s) you are provided with total parental control and internet security the moment you connect to the internet - automatically and instantly. Combining core functionality of a Firewall, Anti Virus, Anti Spyware, Web Filtering/Blocking, Instant Messenger & Usage control with comprehensive reporting - Ni Parental Control enables your family to surf the web safely and securely.

The Ni Parental Control service can operate on up to 3 separate computers/laptops (they do not need to be physically connected or located together) which you then manage centrally via an online Control Centre. This unique feature guarantees that your family are protected

regardless of when, how or where they connect to the internet - at school/college, in a café, at work - it doesn't matter!

The online Control Centre forms the heart of the Ni Parental Control service, and it is here that you can customize and set the rules for each member of your family, change your settings, and view all of the activity reports of your family members. The reports are provided for each user, showing what web sites they have visited, how long they have spent on specific applications, and full details of any instant message conversations that they may have had.

### KEY FEATURES

- o **Instant Messenger Control** - Block/allow or set time limits for the most popular instant messenger applications. Records all the conversations that have taken place.
- o **Web Blocking/Filtering** - Fully customizable - you determine which types of web sites you do, and do not, want your family to visit.
- o **Blocked Website Attempts** - Detailed view of any attempts made by members of your family to reach web sites that you have deemed harmful or inappropriate.
- o **Anti Virus/Anti Spyware** - the latest virus and spyware protection from Kaspersky, one of the world's leading vendors. No updates to download or install - we take care of it for you.

- o **Applications/Software Used** - Analysis of the time spent on specific applications/software used by members of your family during their computer sessions.
- o **Time Controls** - Set time limits for use of both the internet and the computer
- o **Firewall** - Protects your computer and your personal information from external attacks/theft
- o **Peer to Peer (P2P) and Newsgroup Control** - prevent popular, and potentially harmful, P2P & binary newsgroup applications from operating on your computer.
- o **Data History** - All user data is held for 30 days for you to view

## TOTAL CONTROL

The Online Control Centre. You can access the Ni Parental Control Centre from any internet connected computer in the world - perfect from when you are away from home and yet still concerned about your family's safety and

internet usage. You can change and customise your settings and view your reports. And remember, any changes that you make, via the Control Centre, will be applied to the computers that you control with Ni Parental Control - the moment they connect to the internet.
